Parijat Kawale

585-489-3801 | parijat.kawale@gmail.com | [LinkedIn](#)

OBJECTIVE Enthusiastic Full Stack Developer possessing 3 years of industrial experience, actively seeking full-time opportunities, to contribute my technical acumen and innovative problem-solving skills towards organizational goals.

EDUCATION

Rochester Institute of Technology   Rochester, NY
Master of Science in Computer Science   **GPA: 3.86 | Expected 2024**
Savitribai Phule Pune University   Pune, India
Bachelor of Science in Computer Engineering   **GPA: 3.51 | May 2019**

SKILLS

Programming languages and Databases: JavaScript, Angular, React (basic understanding), TypeScript, Java, Spring boot, Rust, MySQL, MongoDB.
Tools: GIT, JIRA, Plane, VS code, IntelliJ.

PROJECTS:

Thread Weaver:
- Designed and developed a proof of concept showcasing the usage of **Virtual Threads in Java 17** in a spring boot application.
- Improved application performance by 40% through the implementation of Virtual Threads compared to Traditional Threads.

UD Prime:
- Specialized in developing **micro-UI reusable Angular components** within this **MVC architecture** deployed on a blue-green deployment model, enhancing the user interface and increase code reusability by 40%.
- Engineered **REST APIs** to streamline and reduce the processing time for account funding processes.

Anugata:
- Collaborated directly with clients as a Front-end developer and team lead to modernize billing software, accelerating record-keeping processes by 20% through innovative solutions.
- Managed the development team, establishing checkpoints to help the everyone and keep the project on schedule.

EXPERIENCE

Tabner Inc | *Skills: Angular 14, Java, Git*   May 2023 - Aug 2023
Intern, Software Developer
- Spearheaded the development of an entire module, from client requirement gathering to achieving production readiness, which reduced application creation time by 10% and provide comprehensive support for its integration.
- Developed a POC to reduce the JavaScript bundle size using webpack manager resulting in faster application building and deployment by 2s.

TIAA | *Skills: Angular, Java, MongoDB, MySQL, JIRA, Micro UI, REST, Scrum, Agile*   July 2019 - July 2022
Senior Software Developer, Analyst
Software Developer, Analyst
- Built account funding process for retail clients across TIAA, minimizing inaccuracies by 70% and reducing total processing time to less than 48hrs.
- Contributed to the design of an advanced platform that bolstered technical skill development, leading to a 15% rise in employee engagement.
- Developed managerial workflows, resulting in a monthly savings of 4-6 hours per team in data analytics and metrics computation.
- Mentored incoming students to help them acclimatize with the team projects.

Anu Computer Consultancy | *Skills: Angular 6, MySQL*   Jan 2018 - July 2018
Intern (Tech Lead), Software Developer
- Directed and supervised a cohort of junior interns to successfully deliver the project within a six-month timeframe.
- Assessed client requirements for billing software and pioneered automation strategies in book-keeping processes, achieving a notable 20% time-efficiency enhancement.

AWARDS
- 'Pat on the Back': Acknowledged for outstanding individual contribution to a pivotal project.
- 'Champion' Award: Recognized for exemplary teamwork and unwavering commitment to surpassing established objectives.
